

The Superior High Pressure Atomizing Nozzle increases safety within your spray dryer!

Compared with all existing houses, this atomizing nozzle system has some real benefits and features:

- Fire safety housing design, reduces risk of fire or explosion;
- Reduces significantly chance on leakage and clogging (build-up)
- Flexible design housing, 1 unique part fits all major nozzle types;
- Fits any spray dryer;
- High pressure, up to 700 bar;
- Easy assembly and disassembly, hand tight;
- Designed in accordance to USDA sanitary guidelines;
- Quality construction, special anti-seize stainless steel;
- Longer wear life.
- All weld connection, no threaded pipe connect;
- Gasket material is FDA approved and resists high temperatures.

The atomizing nozzle is available in two different models:

- Model 698 is suitable, for Fyrtex Nozzle 3, 5, TD and SB
- Model 697 is suitable for Fyrtex Nozzle Mini and SK
